

# Technical Specification Sheet — Model XR-4500

The following specifications define the electrical, thermal, and mechanical operating parameters for the XR-4500 series precision voltage reference module. All values are valid at TA = +25 °C unless otherwise noted. Parameters marked with an asterisk (\*) are guaranteed by design and characterization but not production-tested.

| Parameter                | Symbol     | Min   | Typ   | Max   | Unit   | Tolerance | Test Condition                  | Temp           | Notes              |
|--------------------------|------------|-------|-------|-------|--------|-----------|---------------------------------|----------------|--------------------|
| Input Voltage            | VIN        | 4.5   | 5.0   | 5.5   | V      | ±0.25 V   | VOUT = 2.5 V, ILOAD = 0 mA      | −40 to +85 °C  | Regulated input    |
| Output Voltage           | VOUT       | 2.495 | 2.500 | 2.505 | V      | ±0.1 %    | VIN = 5.0 V, ILOAD = 10 mA      | +25 °C         | Trimmed at factory |
| Temp. Coefficient        | TCVOUT     | —     | 3     | 8     | ppm/°C | ±2.5 ppm  | VIN = 5.0 V, box method         | −40 to +125 °C | Grade A only       |
| Load Regulation          | ΔVOUT/ΔIL  | —     | 0.5   | 2.0   | mV/mA  | —         | 0 mA ≤ ILOAD ≤ 50 mA            | +25 °C         | Sourcing only      |
| Line Regulation          | ΔVOUT/ΔVIN | —     | 0.1   | 1.0   | mV/V   | —         | 4.5 V ≤ VIN ≤ 15 V              | +25 °C         | DC measurement     |
| Quiescent Current        | IQ         | —     | 800   | 1200  | μA     | ±200 μA   | ILOAD = 0 mA, VIN = 5.0 V       | +25 °C         | No-load condition  |
| Output Noise (0.1–10 Hz) | eN_p-p     | —     | 1.5   | 3.0   | μVp-p  | —         | BW = 0.1 Hz to 10 Hz            | +25 °C         | Peak-to-peak       |
| Power Supply Rejection   | PSRR       | 80    | 100   | —     | dB     | —         | f = 120 Hz, VIN = 5.0 V ± 0.5 V | +25 °C         | Ripple rejection   |
| Thermal Resistance (J-A) | θJA        | —     | 120   | 150   | °C/W   | —         | Still air, JEDEC 2S2P board     | —              | SOIC-8 package     |
